

Functional Analyst for Kingspan

Functional Analysts

We are seeking Functional Analysts. Our Functional Analysts will be responsible for the following:

1. Assessing and enhancing a range of SAP computer system processes and templates;
2. Evaluating, developing, improving, and implementing integrated systems;
3. Reviewing and assessing existing issues within the MM and PP modules within computer system processes;
4. Gathering business requirements, designing, documenting, and configuring alternatives;
5. Testing procedures and solutions to best meet staff and user computer and business system requirements;
6. Coordinating the testing of changes with process owners and ensuring that changes are in line with agreed upon service level agreements, timelines, business requirements, and global standards;
7. Implementing accepted recommendations and developed enhancements for procurement and manufacturing needs of the company;
8. Communicating and enforcing consistency in business processes and implementation templates across the organization; and
9. Providing system support through testing, documenting, and conducting end user training regarding SAP enhancements to ensure that the system is being used properly and meeting business needs.

Requirements:

- Master's Degree in Engineering or a closely related field.
- At least three years of work experience in a computer programming position specializing in both Production Planning ("PP") and Material Management ("MM") SAP modules.
